Anaerobic sealing material

PRODUCT SPECIFICATION

Loctite 570 steam sealant

Thread sealing for permanent metal pipe thread connections

Pressure class 8

APPLICATION AND USE

The products are intended to be applied as gas distribution and installation materials for natural gas with an admixture of 20% hydrogen gas and pure hydrogen gas. The maximum operating pressure (MOP) and operating temperature are specified in the approval requirement for the product for GASTEC QA certification.

MARKING

- GASTEC QA, GASTEC QA logo or trademark.
- Manufacturer's name and or registered trade mark
- Pressure class: Klasse 8
- A note: "Alleen voor metalen pijpschroefdraadverbindingen" :
- Type for use with coarse treads:
- Quantity of jointing compound in the package:
- Unique identification mark providing traceability and production date or 'use by' date:
- Essential instructions for use storage and possible limitations
- Appropriate handling and safety labelling
- The words 'Bestand tegen waterstofgas volgens KE 214' or 'Hydrogen ready according to AR 214'.*

RECOMMENDATIONS FOR END USERS

Check at the time of delivery whether:

- the producer has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport.

Consult the producer's processing guidelines for the proper storage and transport methods.

Check whether this certificate is still valid by consulting Kiwa Nederland B.V. or the Kiwa website.

If you should reject a product on the basis of the above, please contact the supplier and, if necessary, Kiwa Nederland B.V.

^{*}in case it does not fit on the product, it can be put on the smallest packaging
